User Manual

Product Name: The Naive Baker

Type: Website/Webapp

Access information: visit the following URL to access the website.

https://naivebaker.herokuapp.com/

Description: *Imagine a world where your kitchen helps you decide what to cook using your pantry and preferences. The Naive Baker is just the beginning.*
You walk into your kitchen, hungry. What happens next?

The Naive Baker is a project to let you explore new recipes with ingredients you already have at hand. Enter your pantry quickly using autocomplete and machine-generated ingredient suggestions, then find out what you can cook! Use the filters to limit the amount of time you have, or to select the particular ingredients you feel like cooking with today.

The Naive Baker can help you think of new ingredients to buy to expand your food repertoire. Suggested ingredients are calculated in real-time so that adding any new ingredient will add new meals to your recipe list. You can also login using Facebook to save your pantry between sessions.

We're building The Naive Baker to make cooking at home more convenient and to empower your kitchen as a tech-savvy part of your house. In the near future, kitchens will have screens and inventory management will be simple. We see The Naive Baker as a way to connect personal inventory management with what's for dinner.

The website is basically giving functionality that you can enter the ingredients, Different filters and how much time you have to cook food, and the website will give you recipes that you can cook under entered constraints.
